Harmonization as one of the main principles of ensuring quality management in higher education system

Harmony is the category of philosophy and aesthetics. In Georgian language it has the meaning of mutual understanding, proportionality and high level of diversity opposing the meaning of the word chaos.

Our research deals with the analysis of the definition of the concept of harmonization and its leading role in the management system in higher education institution. Harmonization is considered to play the critical role in ensuring quality management in Georgian education field as well as generally in the education sphere. The research also deals with the investigation of strategies of achievement harmonization in the higher education institutions.
